

Statement on Community and Environmental Stewardship

Sustainable development underpins every action and decision made at Schollie Research & Consulting. Consultants, Bruce Schollie and Elan Buan, strive to be good stewards of the environment in our communities. As such, we are committed to:

- Minimizing resources consumed and waste produced through reducing, re-using and recycling.
- Adopting and encouraging methods and practices that create less waste such as electronic research methods and reporting.
- Adopting energy efficient processes and practices in our offices.
- Supporting employees in their volunteerism and environmental causes.
- Being active volunteers and contributors in our community. Our service work includes environmental education and promotion through many Scouts Canada initiatives and activities such as:
 - Great Canadian Shoreline Cleanup for 10 years.
 - Scouttrees and other tree planting initiatives.
 - Community recycling projects: bottle drives, inkjet & toner cartridge recycling, electronics roundup & recycling.
 - Anti-idling campaigns, Yellowfish Road Campaign, Project Porchlight, and Home Energy Audits.
 - Wildlife habitat protection and enhancement.

In September 2015, Elan Buan and her Scout Troop, were partners in planting trees in a park, which was a remediated landfill site. The event was part of Scouts Canada's national environmental awareness program "Scouttrees."

In 2012, Bruce Schollie, was one of the Great Canadian Shoreline Cleanup Site Coordinator Achievement Award Recipients. Winners of the Site Coordinator Achievement Award are chosen based on their:

- *Leadership and commitment to shoreline cleanups*
- *Demonstrated ability to increase environmental awareness and inspire others to take action*
- *Innovation in waste reduction and prevention*
- *Involvement in other voluntary activities and programs*
- *Overall contribution to reducing shoreline litter*
